Art To-Do

Every asset the game is made from · Oct 12, 2026

Rules for every image

This is the to-do list: 47 assets that still need art. Each page shows what it is, what exists so far, and what the game draws today.

Style: the reference scenes and the canon set are THE look: colour, light, materials, scale. The ChatGPT tile sheet shows only the tile FORMAT (raised slab, angle, size); its grass is too lime and too bright, so do not copy its colours.

Ground tiles (fields, lawn, pasture, forest floor): a raised slab with soil sides on the dark background. Diamond about 1.55 wide to 1 tall.

Everything that stands up (castles, buildings, mines, trees, people, carts, animals): on a SOLID flat #00FF00 green background, no ground slab under it. Not "transparent", solid green.

Weapon, item and resource icons: solid navy #020A1F background.

Never: flags, banners or pennants on buildings; animals or people on tiles. The game draws those itself.

Size: troop icons must read at 18 pixels, laborers at 28 pixels: simple, bold silhouettes.

Delivery: each asset as its own separate image file, named after its page title. Not a collage, not a new PDF. Do not change any page text, tags or names; list suggestions separately at the end.
