

Aldermarch

Art Book

Every asset the game is made from · Oct 17, 2026 (update 3)

How to read this

One page per asset. The **big panel** is the new art for the Big Bang pass; the **small panel** is what the game draws today, pulled straight from the art embedded in the game file.

The tag in the top corner says where each one stands: **READY** accepted; **STAND-IN** a placeholder on the mock-ups; **SHEET 2** comes in the next ChatGPT sheet; **CANON** the Sep canon version exists (shown), not yet checked at game size; **NOT MADE** or **REDO**; **NEEDS KEY** art the game will use but has no manifest entry for yet; **REMOVE**, **REFERENCE**, **SUPERSEDED** as named.

Where there is no new art yet, the big panel shows the **canon set** (the Sep 4-5 Grok diorama pass, now in `art/_canon/`), or failing that today's in-game art, enlarged. Every page has a picture.

87 asset pages, 51 ready. The game's manifest has 171 keys; it reads 92. The 79 it never reads are thumbnails in the appendix; art for those would never appear.

Built by `tools/art_book.py` from the game file and the accepted art in `art/`. Rebuild it whenever art is accepted; the Art Bible (`art/ART_BIBLE.md`) stays the record of decisions.

Ground

GROUND

READY

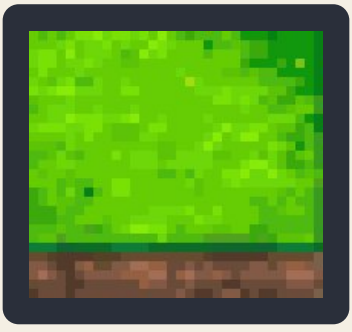

Lawn

`overhead.tile.ground`

NEW ART

IN THE GAME NOW

Plain open ground: most of every county. Four variants, chosen by (col % 2, row % 2) so the pattern does not repeat tile to tile. Known bug: today the key borrows road tile 0 (the no-road shape) through aliasOf instead of having its own ground image. Fixed when this is wired in Phase B.

`art/tileset-grok/`

READY

Forest ground

`overhead.tile.forest`

NEW ART

forest floor

IN THE GAME NOW

Ground under forest cells: leaf litter and moss on a raised slab. The trees are drawn on top as the forest sprite (Land section). ChatGPT sheet-2 batch, accepted Oct 15.

READY

Mountain ground

`overhead.tile.mountain`

NEW ART

lawn under the mountain

`overhead.tile.water`

NEW ART

sheet 1, not used

TODAY'S ART, LARGE - NO NEW VERSION YET

sheet 1, cows painted in (not used)

CANON SET (SEP) - WHAT IT SHOULD SHOW

Roads

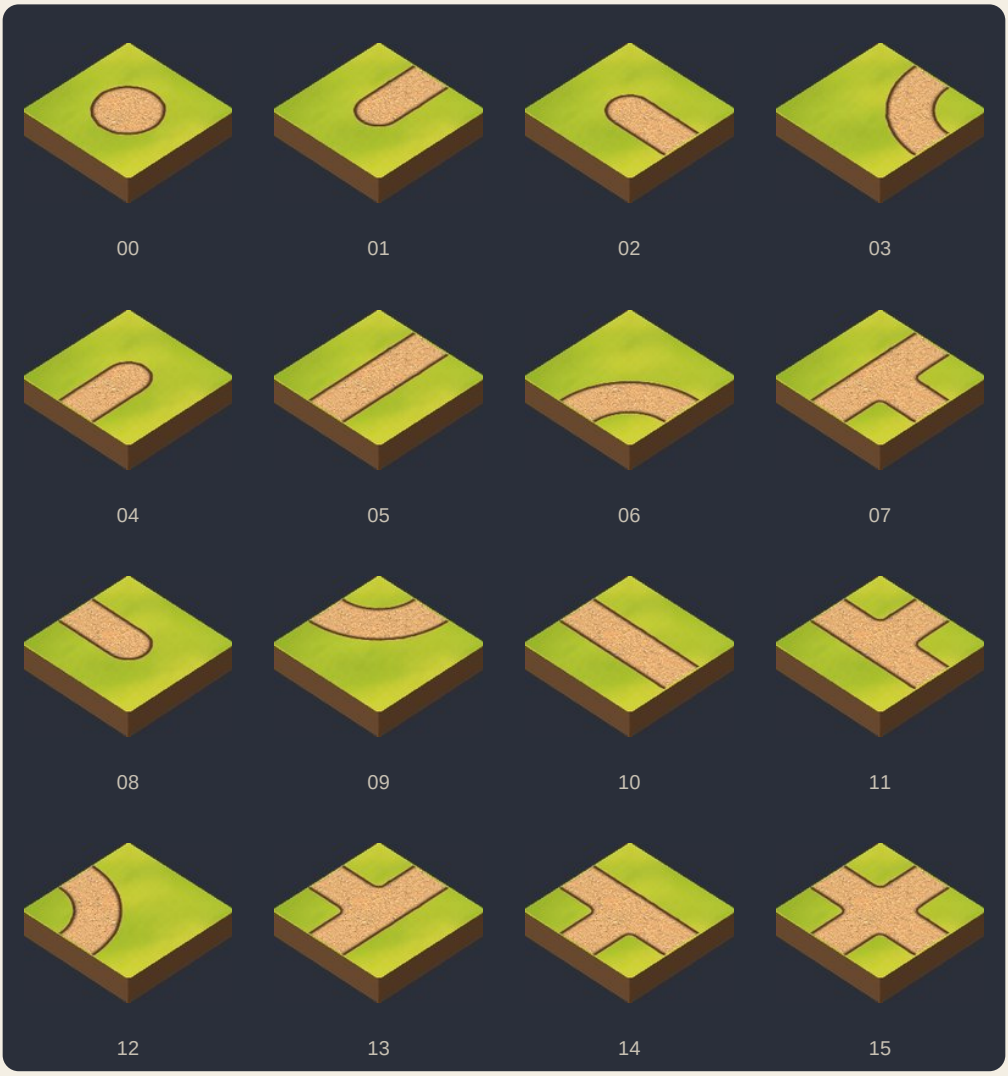

1 page

READY

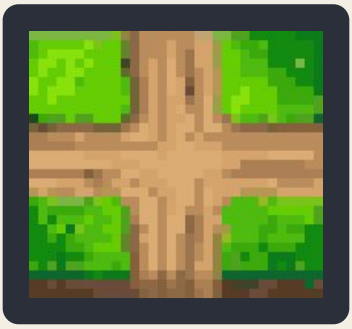

Dirt roads (16 shapes)

`overhead.road.0 ... overhead.road.15 (16 keys)`

NEW ART

IN THE GAME NOW

Every road shape a cell can need. The file number is the autotile mask: N=1, E=2, S=4, W=8 added together for each neighbouring road. Built by Claude from the sheet's own dirt (tools/roadgen_iso.py), so they join seamlessly. Phase B: today the keys point at shuffled file names.

`art/road-sheet/`

Borders

NEEDS KEY

County border wall

no manifest key yet

NEW ART

IN THE GAME NOW

IN THE GAME NOW

nothing

Tiles from ChatGPT sheet 1 with no use in the game today. The crossroads tile is where the road dirt colour came from. The watchtower is kept in case watchtowers are added later (it has a painted flag to remove first). Bridges and shore wait on water, which is deferred.

IN THE GAME NOW

nothing

Concept paintings that set the target look: warm light, chunky diorama tiles, small figures on big fields. Style references only. They are single paintings, not built from tiles, so no game art is cut from them (Lessons, Oct 11).

KEPT FOR HISTORY

IN THE GAME NOW

nothing

Ground tiles built from Grok textures at 2:1 (each type also has variants -01 -10 -11). Darker and more photo-like than ChatGPT sheet 1. Kept only in case sheet 2 misses a field type; re-project to 1.55 before using.
